EFS 4x4 Accessories

New to EFS is the Stockman Adventure Bullbar range. This new bullbar is designed and developed in Australia to suit our harsh conditions, with salt spray and UV metal coating testing. It complies with Australian design rules and has been crashed tested to meet motor vehicle airbag safety regulations.

Installation

Installation is relatively easy for the DIYer as its been designed to be a full bumper replacement. So there is no unnecessary cutting of the standard front bumper in most cases.

Specifications

- Made from tuff oversized 63mm tube steel bar.
- Equipped with super bright led driving lights & indicators
- winch comaptable with winch cradle mounting bracket
- Complete with lower bullbar bash plates, twin aerial mounts and CNC cut underhead light infill trims.
